

ARTICLES PUBLISHED IN WESTON ENGINEERING NOTES

Volumes I and II—1946-1947

ARTICLE NO.	TITLE	VOLUME NO.	ISSUE NO.
1	The Galvanometer and the Bridge—J. H. Miller	I	1
2	Copper Oxide Rectifiers as Used in Measuring Instruments—J. H. Miller	I	1
3	Shock or Impact Testing Mechanisms—A. T. Williams	I	1
4	Conduction Grid Current Megohmmeter—O. J. Morelock	I	2
5	The Single Point Potentiometer—A. G. Smith	I	2
6	Special Test Set for Relays—E. R. Kebbon	I	2
7	Weston Airway Hazard Marker Illumination Control Relay—A. H. Lamb	I	2
8	Thermocouple Ammeters for Very High Frequency—J. H. Miller	I	2
9	Weston's Cadmium Cell—F. X. Lamb	I	3
10	Weston Vacuum Type Thermoelement—M. C. Kunz	I	3
11	Simplified Bridge Analysis—J. H. Miller	I	3
12	A Complete Direct Reading Gm Tube Tester—O. J. Morelock	I	4
13	Differential Instruments and Relays—A. H. Lamb	I	4
14	Guns Aimed with the Aid of Thermometers—A. H. Lamb	I	4
15	The Weston Master II Universal Photographic Exposure Meter—A. T. Williams	I	5
16	A Variable Ratio Current Transformer—J. H. Miller	I	5
17	A Method of Panel Mounting Weston Models 430-432-433—J. H. Miller	I	5
18	Blind Approach Indicators—W. H. Skidmore-E. W. Hoyer	I	6
19	Mechanical Erosion of Thermowells and Thermometer Stems—A. H. Lamb	I	6
20	Instruments for Frequency Modulation Monitors—A. G. Smith	I	6
21	A Bridge for High Resistance, High Voltage Measurements—J. H. Miller	I	6
22	Modern Thermometry—A. H. Lamb	II	1
23	The Weston Industrial Circuit Tester—O. J. Morelock	II	1
24	The Measurement of Reactive Power—A. F. Wolferz	II	2
25	Special Load Circuits for Use with the Weston Photoelectric Cell—R. W. Gilbert	II	2
26	The VU Indicator—A. G. Smith	II	2
27	The Weston Photographic Analyzer—A. T. Williams	II	3
28	Weston Vacuum Thermoelements—M. C. Kunz	II	3
29	Organizing an Electrical Instrument Standardizing Laboratory—J. B. Dowden	II	3
30	A New Humidity Indicator—A. H. Lamb	II	4
31	Absolute Units Replace International Units Next Year—W. N. Goodwin, Jr.	II	4
32	Organizing an Electrical Instrument Standardizing Laboratory—J. B. Dowden	II	4
33	Methods for Determination of Resistance of Power Sources—J. H. Miller	II	4
34	The New Weston Engineering-Administration Building—J. H. Miller	II	4
35	Electrical Resistance Alloys—W. N. Goodwin, Jr.	II	5
36	The Effect of Harmonics on A-C Ammeter and Voltmeter Indications—R. F. Estoppey	II	5
37	Wheatstone Bridge—List of Circuit Equations—W. N. Goodwin, Jr.	II	5
38	Distinguished Italian Visitors at the Weston Laboratories—W. N. Goodwin, Jr.	II	5
39	Engineering-Administration Building Housewarming—October 24, 1947—J. H. Miller	II	6
40	Thermal Problems Relating to Measuring and Control Devices—W. N. Goodwin, Jr.	II	6
41	The Weston Electronic Analyzer—O. J. Morelock	II	6
42	Chemical Corrosion of Thermometer Stems, Thermowells, Separable Sockets, and Associated Apparatus—Anthony H. Lamb	II	6

COPIES are available on all issues except Volume I, Number 1 and Number 6. Requests for
available back issues should be mailed to the attention of the Editor, Weston Engineering Notes.
